I. Sights in New York

1. Times Square – some information about it

Times Square in New York City is found at the junction of Broadway and Seventh Avenue and it is called like this because the New York Times Square building ("T.S.1"). It is the tallest skyscraper in New York. It stretches from West 42nd Street to West 47th Street and it is the center of the Broadway theatres of Manhattan.

There are about 40 theatres in the district around Times Square and enough fast food chains and cafés, so that you will not be hungry. You also find souvenir shops for buying souvenirs for yourself, your friends or relatives, but also fancy restaurants, cinemas, the MTV studios, Sony and the headquarter of "Vogue" magazine. Times Square has plenty of illuminated signs. It is famous for this. Times Square has its own riot police and its own garbage collection which is organized by Times Square Business Improvement.

Some historical facts about Times Square:

In the 1930s Times Square was officially divided into two sections. The southern end was named Times Square and the northern end was renamed Duffy Square.

The "Naked Cowboy" –
who is not actually naked
– has become a legend on
Times Square for decades.

One Times Building:

place: New York City, USA

Constructed between 1903 and 1905

architect: Cyrus L.W. Eidlitz

floors: 25

height: 110,6 metres

Until 1928 it was used as the headquarters of the "New York Times" newspaper.

2. The Empire State Building

The Empire State Building was built in 1931 and was finished on March 17th 1933.

The ESB is 443,2 metres tall and has 103 floors. The elevator just takes 50 seconds to the 86th floor. Inside the elevator is an e-wall where you can watch a movie about how the tower was constructed. The Empire State Building is so amazing that it appeared in about 90 movies from all over the world. The most famous one is King Kong. Inside the building up to 15.000 workers are employed and everyday 10 to 20.000 people enter the building, most of them being tourists. On a clear day you can see as far as 45 miles from the top.

The Central Park is a famous urban park in the middle of Manhattan. It was opened in 1873. Everyday 500.00 people enter the park. It is 4,7 kilometres long. The Central Park is popular for the zoo and for the grey squirrels.

It is next to the Museum of Natural History.

DID YOU KNOW?

...that the ESB is located right in Midtown Manhattan on 350 Avenue and between 33rd and 34th Street

...that the ESB does not just have 103 floors, but has 74 lifts in total

...that the ESB was the world's tallest building from 1931 until 1972, but then the World Trade Center was built

...that when the World Trade Center collapsed in 2001, the ESB was again the tallest skyscraper in New York until the new One World Trade Center was reconstructed

...that the queue to enter the building is often very long and you have to wait at least 30 to 60 minutes if you want to enter

...so better wear comfortable shoes ☺

4. The Statue of Liberty

The Statue of Liberty was built in the year 1875. It is 93 metres tall and was inspired by the French architect Édouard René. It was a sign for the American Independence. It was a present by the French people and was given to the inhabitants of New York on 18th October. If you like to visit the Statue of Liberty, first you have to take a bus which brings you to the docks in the southern part of Manhattan. There you jump on a ship which either takes you to the island and you can visit a museum or the ship takes a tour around the Statue of Liberty. Inside the statue you can find a museums about the history, the building itself and other interesting information.

Two planes flew into the Twin Towers of the Word Trade Center which were the highest buildings in the southern part of the island Manhattan. The Twin Towers burned and collapsed which resulted in the death of 2750 people.

After that people built the *Ground Zero*. Nowadays the Ground Zero covers the area of the former and destroyed Word Trade Center.

6. One World Trade Center

Center

After you have seen this breath-taking place, you have to see the One World Trade Center. It is the tallest building in New York City. To build this amazing Center, it took more than eight years. The One World Trade Center is 541.3 metres tall and it's the sixth highest building in the word.

It's amazing. You have to see these places!

II. The top 8 inside tips of New York City

1. New York High Line Park

The green park is above the roofs of New York and is a good place to recover. It was an overhead railway, but nowadays it is abandoned. On the High Line you have a fantastic view over Chelsea and Meatpacking District, but you can also relax, eat in delis and see live-performances of artists. For people who like sports there are different wellness courses for example Tai Chi.

A special subway station down in the City Hall, built in 1904 and closed 40 years later takes you on a time trip. Now you can marvel at¹ wonderful architectural details and decorated glassy elements. If you want to get your own idea of³ this, you can book a tour through the City Hall Metro Station or use the subway line 6 to the terminal, but don't get off there. The subway will drive a loop and pass through the station. Then you will see the station only for a moment, but it's cheaper than the tour.

Pizza, cronuts, hot dogs or steaks – in New York you can eat what you want. So here some tips for restaurants, which you have to visit: Katz's Deli (Here you should order a pastrami sandwich.), Bleeker Street Pizza, Gray's Papaya for super hot dogs and Serendipity III for unbeatable desserts (especially recommended is the “Forbidden Broadway Sundae”, see on the right).

1. China Town

China Town is in the southern rim of the Lower East Side in Manhattan. It is a very big street. It is on the Canal Street, Mott Street, Pell Street and Doyers Street and there are about 200 restaurants. The best “dim-sum restaurant” is the “Nom Wah Tea Parlor”, the second best restaurant is “Jing Fong” and the third best restaurant is “Dim Sum GoGo”. You can eat shrimps, meat and vegetables. It is very delicious. More than 80.000 people live in this traditional part of Manhattan.

2. Little Italy

Little Italy is on the east side of South of Houston in Lower Manhattan and right next to China Town. The most famous street is the “Mullberry Street”. More than 40.000 people live there, but only 5% of the inhabitants have

Italian roots. It is the best place to enjoy pasta or lasagne, but the most popular food is pizza. Italian food is the 5th famous food of New York. In Little Italy you can also buy clothes and the houses look like original Italian ones.

3. Brooklyn

The **Brooklyn Bridge** is the most famous sight of Brooklyn, a part of New York east of the Manhattan Island.

The Brooklyn Bridge was originally called the New York and Brooklyn Bridge and the East River Bridge.

The construction of the bridge was completed in 1883.

It is 1833,68 metres long and 25,91 metres wide.

It is built over the East River which enters the Atlantic Ocean right next to it.

Constructed by John August Roebling.

The Brooklyn Museum was opened in 1895. It is the second biggest museum in New York City.

The engineers were named McKim, Mead and White Daniel Chester French.

You can see a lot of famous modern art there

You can easily go there by taking the subway.

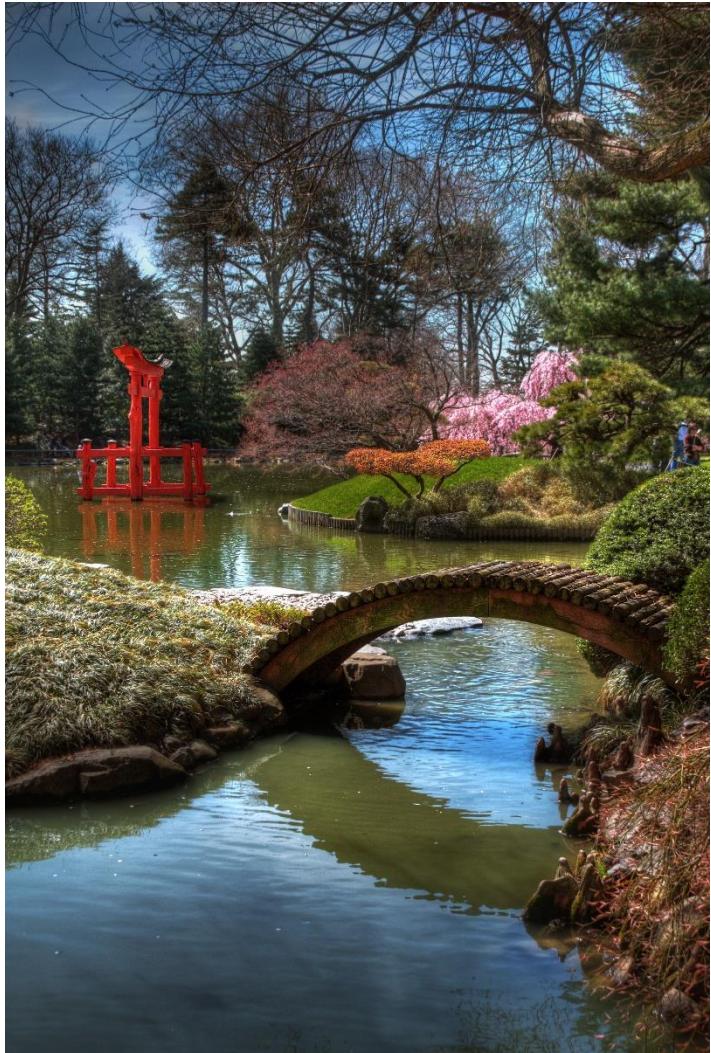

Brooklyn Botanic Garden is a park in the borough of Brooklyn in New York City.

There are plants from all over the world.

The Botanic Garden has 725.000 visitors every year.

You can visit the Botanic Garden at 990 Washington Avenue.

It's similar to the well-known *Palmengarten* in Frankfurt.

4. Harlem

Harlem is the northern section of the New York City borough of Manhattan.

It was named after the city of Haarlem in the Netherlands.

In the past century the Italian mafia was very strong there.

Many famous music artists and rappers are from Harlem, like f.e. ASAP Ferg.

V. History and specials about New York City

1. Ellis Island

In the past many people went to America. In 1892 Ellis Island was opened as a place for immigrants and by 1924 twelve million immigrants had entered the USA. Nowadays Ellis Island is a National Monument and a museum

Ellis Island in the past:

Why did so many immigrants enter the USA?

There have been many reasons. Some people weren't allowed to practise their religion or they were poor and hungry. In America they could realize their dreams what they weren't able to do in their own country.

Could everyone enter the USA?

No, only the smartest could stay.
So some people were declined
that's why this island is also called
the island of tears.

Ellis Island today:

Since May 11th 1965 the island is managed together with the Statue of Liberty as a part of the statue of liberty national monument and as a memorial by the central park administration.

How can you reach Ellis Island?

You can reach this monument by taking a ferry from the Battery Park.

What can you see there?

There is a museum which can provide you with a lot of information about the past of the USA and the immigrants. Every half an hour there is a guided tour through the museum. There are also some quotes of the immigrants like:

"This is the only country where you are not a stranger, because we are all strangers."

It is not guaranteed that you will come back happily from your visit to the island...

2. Special events in the city

Here are two special events in New York which are in our opinion the most spectacular and interesting events. If you are in New York you should really visit at least one of these festivals and events.

Macy's Thanksgiving Parade

Macy's Inc. is the largest warehouse operator in the United States with 728 branches. The headquarters are in Cincinnati, Ohio. The main house is in New York City, one of the largest department stores in the world and particularly well known. The company is listed on the New York Stock Exchange.

One of the most popular holiday parades in America is *Macy's Thanksgiving Parade*.

This parade begins at Central Park west and ends at Macy's Herald Square. There you can do many things. You can buy a balloon or listen to bands. But not only that there are cheerleaders, dancers or really cool celebrities. That is exactly the reason why you should arrive very early, because there are more than 8.000 people enjoying the spectacle. Since 1924 it's a tradition that began as a day of giving thanks for the blessing year. It's every year on 23rd November from 9:00 in the morning until 12:00 p.m. and each year it gets bigger and better. Not only because of the huge balloons, there is a great atmosphere, too. If you want to go there, you can get there by subway.

New York Fashion Week

New York is known as the most popular city all over America. Not only because of the trendy food, the skyline and the Statue of Liberty, but also for the latest fashion at the New York Fashion Week. It takes place four times a year and it has many famous designers, photographers, stylists and beauty experts. But not only designers have the honour to be there, also models like Gigi Hadid, Bella Hadid or other models. The last New York Fashion Week was from September 7th until 14th. But don't be sad, the next Fashion Week is definitely coming and begins on February 8th until 16th in 2018. Many famous labels like Michael Kors, Alexander Wang or Victoria Beckham are presenting their new collections.

So you should really go there and check new trends or even the trendiest collections!

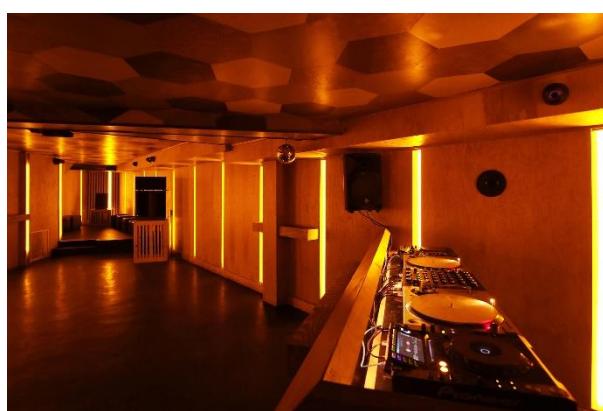

3. New York City's nightlife

New York offers an incredible range of nightlife activities. You can go to bars and clubs or maybe there is even a festival or a stand-up comedy show:

The number one of the clubs is the **Bossa Nova Civic Club**.

There are other bars and clubs like the No. 2 club in NYC: **Good Room**

When you don't like them then there is another club which is ranked as the third best club in NYC: **Black Flamingo**

PS: It's really expensive to have a party in NYC. Maybe you prefer one of our other options...

Rooftop Bars

I know that we talked about bars and clubs now, but one of my favourite places especially the Rooftop Bars, in which you have a brilliant view over the city and can get some nice cocktails with your friends. I will recommend you my three favourites down below:

1. **Gansevoort Hotel (Plunge Rooftop Bar + Lounge)**

In this bar you enjoy one of the best views over the city with awesome drinks and skilled DJs. The problem is that you usually have to wear some really fancy clothes, because they have a strict dress code.

And just to mention: *If you want to get a table in this bar, you have to reserve.*

2. **The Roof (on the PUBLIC Hotel)**

The Roof is the first rooftop bar which was opened in Lower East Side, but don't think that this bar is not popular. With its great view of Midtown and Downtown you can also see the Empire State Building and also the One World Trade Center.

3. **Jimmy** (on the James Hotel) SoHo

The **Jimmy** is just a small bar, but with some bonuses. For example you will sit in a nicely decorated garden,

in which you can have a great lunch with your friends.

If you are not really a party person, but you just want to laugh and have fun you could choose a:

Comedy Club

I have some friends who are not really enjoying to party. That is why I invited them to some great Comedy Clubs. Here you find my top three selection:

1. **Stand Up NY**

This club is a great place to laugh and listen to the great Stand-Up comedians here in the

club. But make sure that you are in before 10:15 in the evening to get a seat, because the shows are normally sold out.

2. Comedy Cellar

The Comedy Cellar is the most popular comedy club in Manhattan. Before the show starts you should probably eat and drink

something in the upper floor. And please be early, if you want to get a good spot to watch the show.

3. Broadway Comedy Club

In this club you will see many celebrity comedians, who started their career here. One show features four stand-up comedians.

We hope you enjoyed our selection.

Your options for going out in New York are simply unlimited and the city offers a place no matter the mood you are in. ☺

VII. Things to do in two days

First you need to plan your trip before you will visit New York. You need to go and visit some sights, because you won't have much time.

A standard double-decker bus tour is perfect and it also doesn't take so much time and then of course, you also need a map of the city. There are some very good apps which offer various maps of the city or ask for one at a tourist information office.

Here is one of my favourite guides:

Now that we have a guide, but we just have two full days in New York City. That is why you find the most important and spectacular attractions in the following text:

The Empire State Building is the classic one. Everybody visits the top of it on his or her trip, because you have a great view over the enormous skyline of New York. If you want to relax, go to the Central Park. There are lots of trees, flowers, ponds and lawns for sunbathing. History is an important aspect, so you need to go to the Ground Zero. It's a monument or tribute for the victims and their families. Over two thousand people died there on September 11th 2001. But New York is not just an attractive city, it is also economically important with the Wall Street. It is the biggest stock exchange in the world, so when you need money, just go there and try your luck ;). I think after all of this you will need some rest. You can get it around the Statue of Liberty which is located on a separate island. In the night you need to go to the Times Square. There are fantastic lights, TV screens and sometimes even special shows.

We all hope you enjoyed reading through our guide and now have some ideas for a future trip to this fantastic metropolis.
